Description of Hardware and Software Specifications

The software will deliver optimal performance when your system meets the following hardware and software specifications:::

Operating System: Windows 10 Home

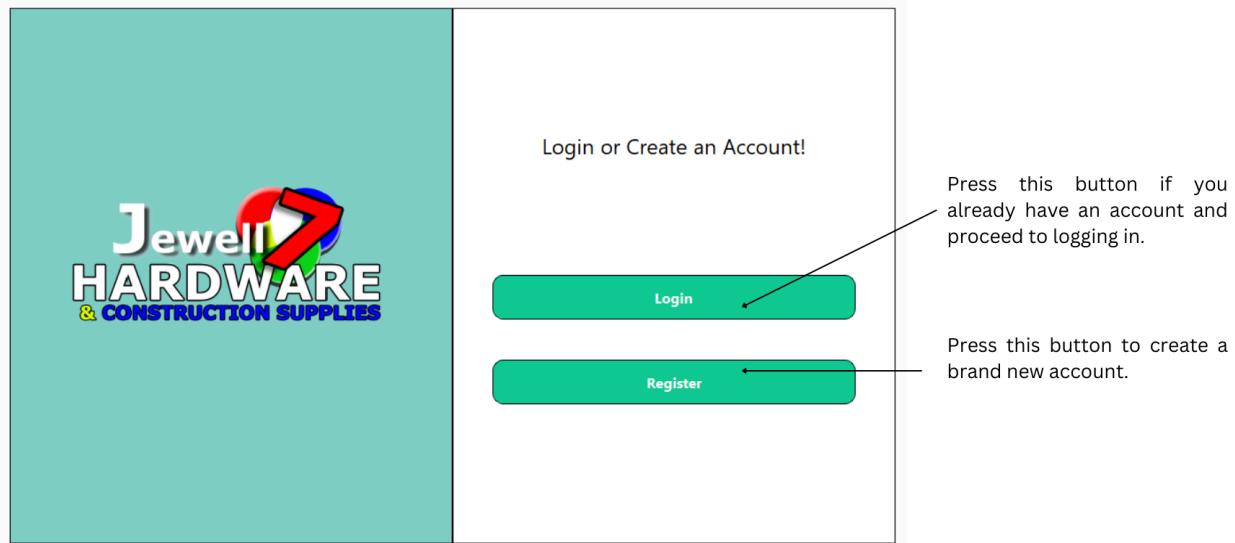

Processor: Intel Core i5-11600K

Memory: 8 GB

Storage: 256 GB

Step-by-step user guide with complete instructions and screenshots

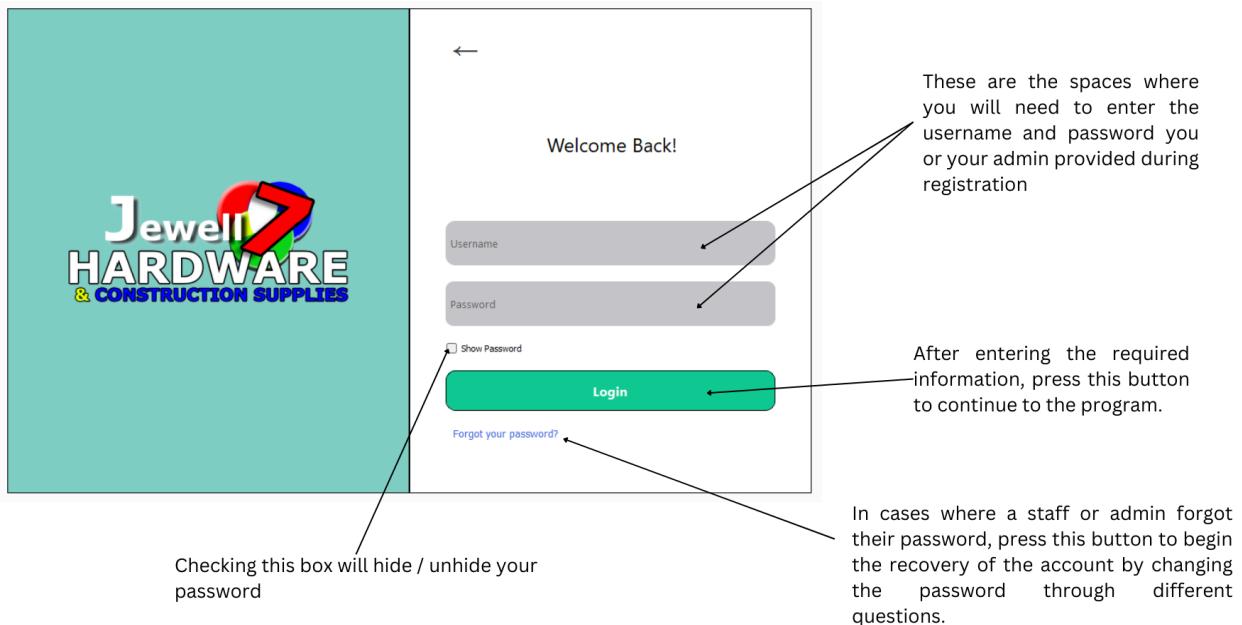

I. Initial Screen

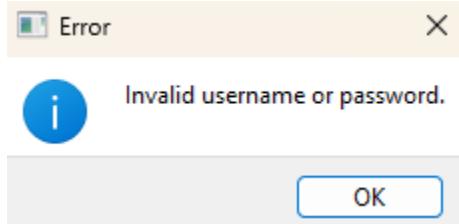

Upon opening the program, the user is greeted with this initial screen which leads to either login or registration.

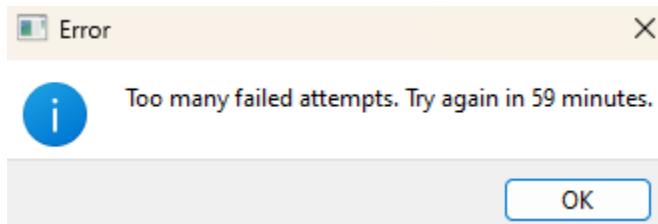

II. Account Login

To login, users must input their registered accounts' username and password.

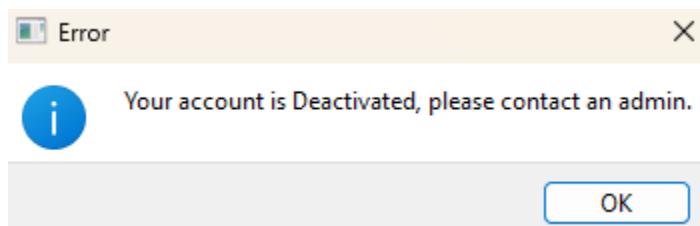

If the password doesn't match the registered username, the following message will appear. Make sure you entered the right details. If you are a staff member and forgot your password, contact your administrator so they can update your account details personally.

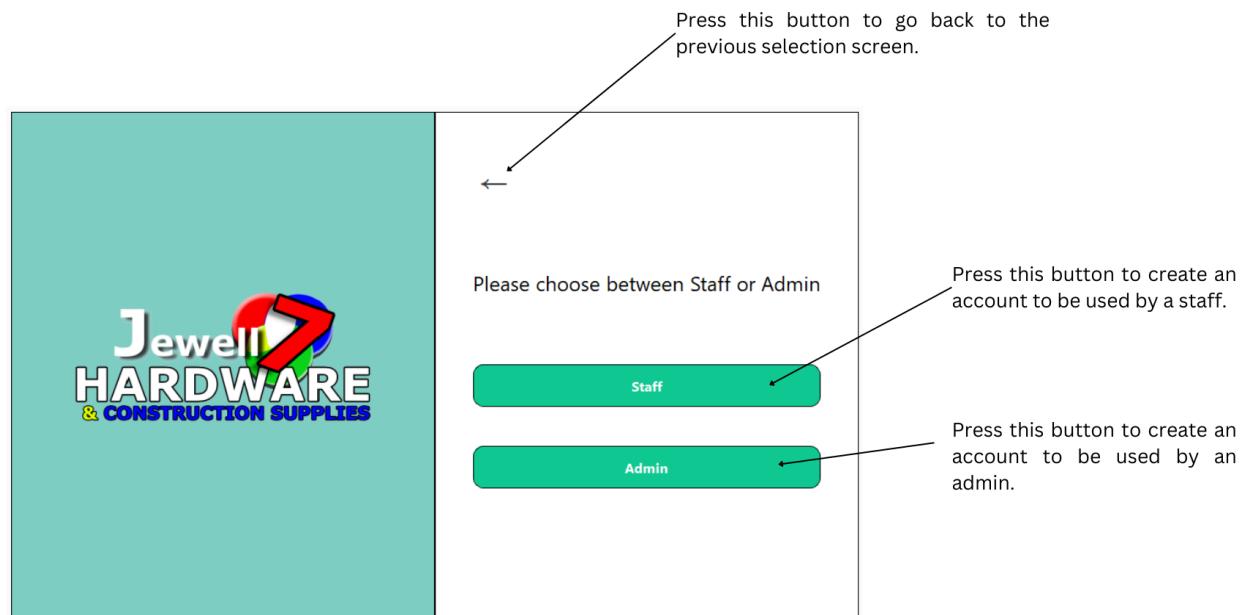

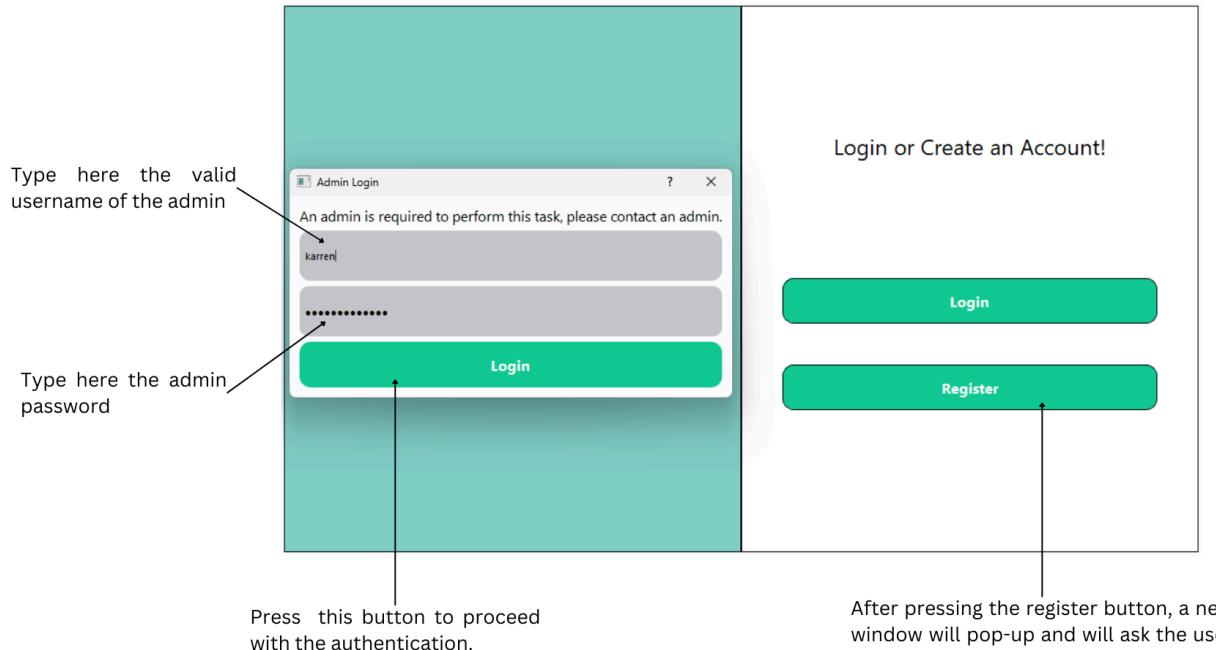

If a user fails to log in 5 times in a row, the system will block further login attempts until a timer expires.

Users with deactivated accounts cannot log in. Please contact your administrator to resolve this issue.

III. Account Registration

Staff Account Registration

Press this button to go back to the previous screen.

Type your first name here.

Type your last name here.

Type your desired username here (remember this details since you will use it to log in).

Select the date of your birth by clicking the ▼button, which will open a calendar.

Click this to proceed with the registration. Make sure all details are filled up properly.

Click this button to automatically remove all the texts you entered in all spaces.

Type your desired password here (remember this details since you will use it to log in). Your password must be between 8-12 characters.

Checking this box will hide / unhide your password

Admin Account Registration

Press this button to go back to the previous screen.

Type your first name here.

Type your middle name here.

Type your last name here.

Type your desired username here (remember this details since you will use it to log in).

Type your date of birth manually or Select the date of your birth by clicking the ▼button, which will open a calendar.

Click this to proceed with the registration. Make sure all details are filled up properly.

Click this button to automatically remove all the texts you entered in all spaces.

Type your desired password here (remember this details since you will use it to log in). Your password must be between 8-12 characters.

Checking this box will hide / unhide your password

IV. Forgot Password/Changing of Password

The form is titled "Forgot Password". It includes fields for "Set Birthdate" (with a dropdown menu showing "1/1/2000"), "Middle Name", "New Password", "Confirm Password", and a "Show Password" checkbox. A large green button at the bottom is labeled "Change Password".

Annotations provide instructions for each field:

- Press this button to go back to the previous screen.
- Type your date of birth manually or click the ▼button, which will open a calendar.
- Type your middle name here.
- Type again your new password here, make sure that it's exactly the same with your new password.
- Click this to proceed with the changing of password. Make sure all details are filled up properly.
- Type your new desired password here (remember this details since you will use it to log in). Your password must be between 8-12 characters.
- Checking this box will hide / unhide your password

Forgot and changing of password is only exclusive to the Administrators. Only they can change their account passwords accordingly.

The Admin must input his/her registered birthdate and middle name within the system. Then, the system will check if it matches the Admin's account.

V. Dashboard

Admin Dashboard

The Admin has access to all the modules within the system.

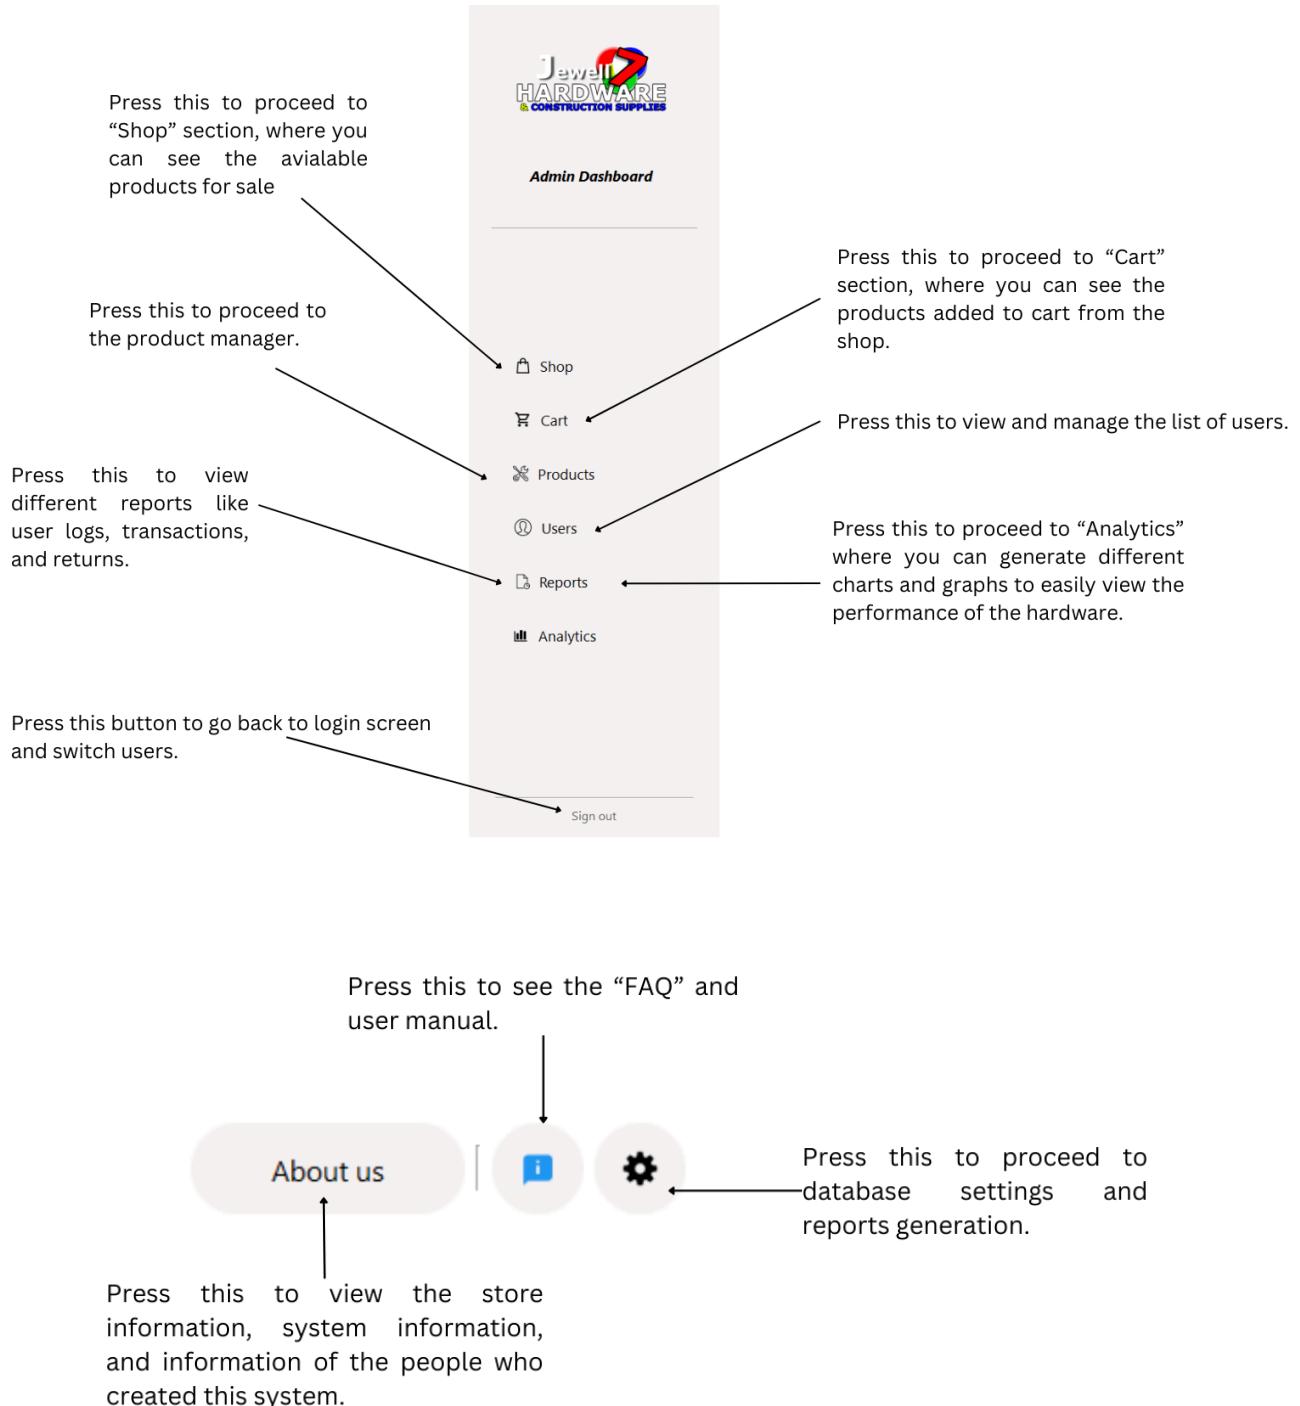

Staff Dashboard

The Staff only has access to Shop, Cart, About Us, Help and Sign out, unlike the admin.

Navigation

These buttons will allow you to navigate throughout the system and perform their corresponding tasks.

VI. Shop

This section of the program will display all the items that are available for sales along with other crucial information about the different products. In shop, you can search for a specific product, or add a selected product to the cart (the product which is to be purchased by a customer).

After typing the desired product , press this to search among the list.

You can type the product that you want to search here.

Admin Dashboard

Add to cart

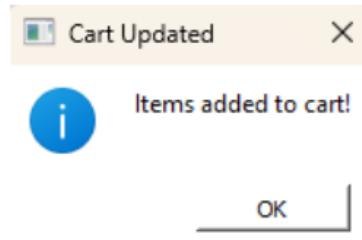

Press this button so that the selected item will be added to the cart.

Add to Cart

Type here the exact number of available product that you want to put into the cart.

After pressing add to cart, this window will pop-up.

A successful checkout will pop this dialog up.

VII. Cart

This section of the program will display all the items that were added to the cart from the shop. In this section, the cashier can perform different tasks to the products that are within the cart.

Here is the list of items that you have added to the cart.

Product	Brand	Variation	Size	Quantity	Total Price
Hammer	Hp	Metal	16mm	5	4749.95
Paint	Boysen	Black	10kg	5	3999.95
Nail Polish mi Yohan	wana	black	None	5	348.45
Wrench	None	Silver	None	5	1499.95
Wrench	None	Silver	None	5	1499.95
Plywood	-	Oak	12x16	5	2499.95

Total Price: ₱14598.20

Press this to remove a selected item inside the cart.

Press this to checkout the item and proceed to the payment form.

Press this to mark an item as a replacement, making its price 0. Note that this action requires admin permissions.

Press this to remove all the items inside the cart.

This text indicates the total price of the products.

Mark as replacement

Product	Brand	Variation	Size	Quantity	Total Price
Plywood	None	Oak	None	5	2499.95
Smartphone	BrandB	ModelY	6 inch	5	0.00
Paint	x	white	None	5	449.95

This is an example of an item that is marked as a replacement.

Checkout

The following payment form will pop-up after checking out.

The form is titled "PAYMENT FORM". It contains four input fields: "Customer Name" (Karren), "Contact Number" (09093649109), "Address" (Bulelak St. Marikina City), and "Amount Paid (₱)" (8200). At the bottom are "Clear" and "Complete" buttons.

Type here the name of the customer

Type here the exact address of the customer

Type here the contact number of the customer

Type the amount that the customer gave to you here.

Press this to quickly clear all the items you typed.

After typing the sufficient amount of payment, press this button to finish the transaction.

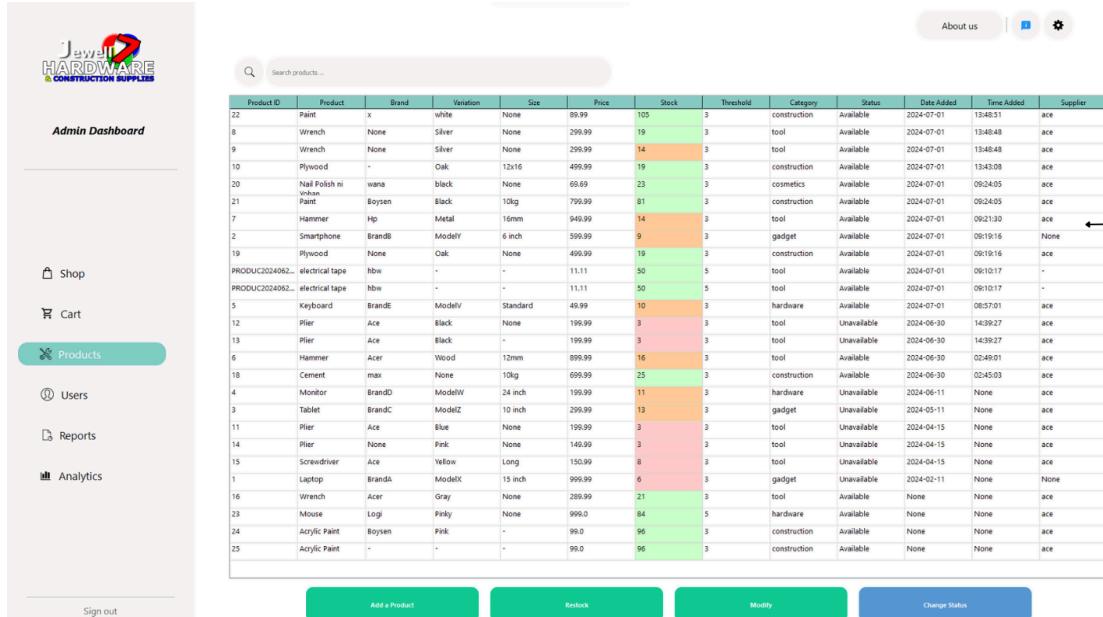

Receipt

After successful payment, an unofficial receipt will be shown containing the important information within the transaction.

VIII. Products

This section of the program will display all the items that were added to the system, along with their respective important details. Only the admin can manage the products within the system and update the inventory as they wish.

The screenshot shows the Admin Dashboard for Jewell HARDWARE & CONSTRUCTION SUPPLIES. The main area displays a table of product information. A search bar at the top says "Search products...". Below the search bar is a navigation menu with links: "About us", "Help", and "Settings". The table has columns: Product ID, Product, Brand, Variation, Size, Price, Stock, Threshold, Category, Status, Date Added, Time Added, and Supplier. The table contains 29 rows of data. The "Products" link in the sidebar is highlighted in green, indicating the current active section.

This table displays all of the information about the products.

Press this button to add a product and proceed to the product management form.

Add a Product

Press this button to restock a selected product.

Restock

Press this button to modify the details of the selected product.

Modify

Press this button to change the status of a product to either “Available” or “Unavailable”.

Change Status

Add a Product

This interface will open upon clicking “Add a Product”.

The screenshot shows a Windows-style application window titled "Product Management". Inside, there are several input fields and controls:

- Product ID:** PRODUC20240701SJG (disabled, indicated by a grey background)
- Product Name:** * (Required field)
- Brand:** (Text input field)
- Var:** (Text input field)
- Size:** (Text input field)
- Price:** * (Required field)
- Qty:** * (Required field)
- Category:** * (Dropdown menu with "New Category" option)
- Threshold:** 5 (Input field with up/down arrows)
- Status:** * (Radio buttons: Available (selected) or Unavailable)
- Supplier:** (Text input field)
- Add** button (Bottom left)

Annotations explain the fields:

- Product ID: A computer-generated ID for each product. This value can not be edited.
- Product Name: Type the product name here. This field is required.
- Brand: Type the product brand here.
- Var: Type the product variation here (color, material type, etc.).
- Size: Type the product size here.
- Price: Type the price here, this field is required.
- Qty: Type the product quantity here, this field is required.
- Category: Specify the product category here. You can use the dropdown menu for existing category or the textbox for new category.
- Threshold: Manually type or increase and decrease the threshold using the arrows.
- Status: Select here whether the product will be listed as available or not.
Available = for sale Unavailable = not for sale
- Supplier: Type the name of supplier here, if applicable.
- Add: Press the “add” button to store new product information in the system.

Restock

This interface will open upon clicking “Restock” while having a product selected.

The screenshot shows a Windows-style application window titled "Restock Product". It includes a "Monitor" section and a "Quantity to Restock:" section.

In the "Quantity to Restock:" section:

- Quantity to Restock:** (Text input field)
- Restock** button (Bottom right)

Annotations explain the interface:

- Monitor
- Quantity to Restock: Type here the amount of the selected product that you want to add to the inventory.
- Restock: Press this button to add the products to the inventory.

Modify a Product

This interface will open upon clicking “Modify a Product” while having a product selected.

The screenshot shows a window titled "Modify Product". It contains the following fields:

- Product ID: 14
- Product Name: * Plier
- Brand: (empty)
- Var: Pink
- Size: (empty)
- Price: * 149.99
- Qty: * 3
- Category: * tool (dropdown menu) New Category
- Threshold: 3
- Status: * Available Unavailable
- Supplier: ace

At the bottom are two buttons: "Modify" and a close button.

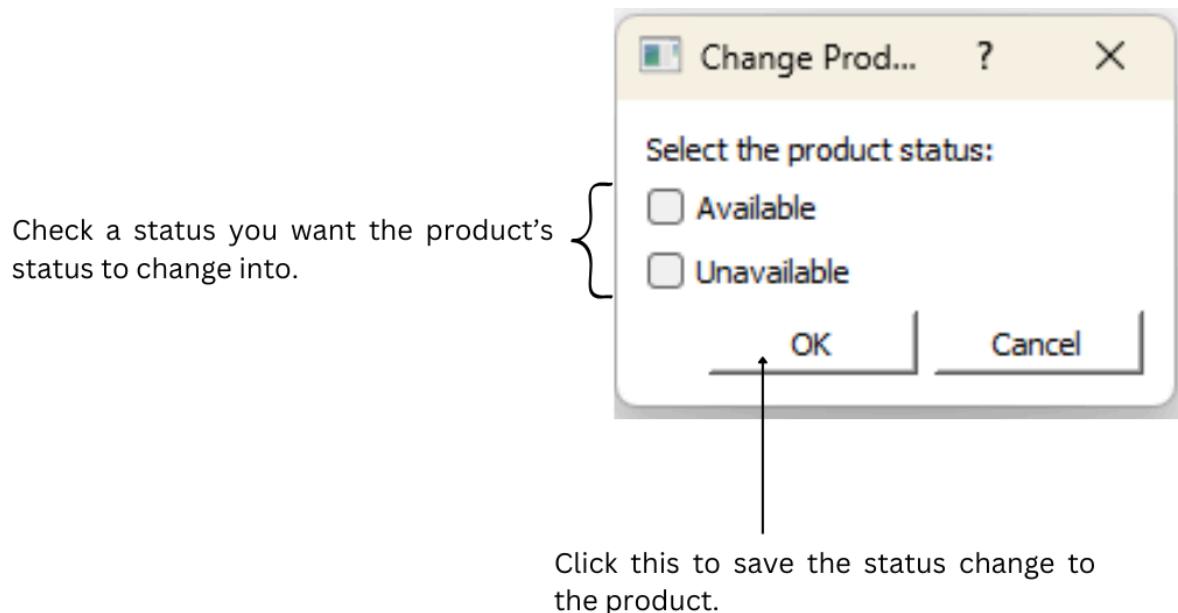

Click the space below the product detail you want to modify, and type the new detail you want to replace it with.

Click this button to save the modification.

Change Status

This interface will open upon clicking “Change Status” while having a product selected.

IX. Users

This section of the program will display all the users registered within the system. The admin can perform different tasks to a user's account.

First Name	Last Name	Username	Password	Level of Access	Status
John	Doe	qwe	qwe	admin	Active
Gojo	Hinati	idkcat11	hollowpurple	staff	Active
bryan	Namzon	bryx	123	admin	Active
jose	tan	jumu	password123	admin	Active

Sign out

Click this to Activate/Deactivate a user's account. An account is enabled when it is activated. Otherwise, its disabled.

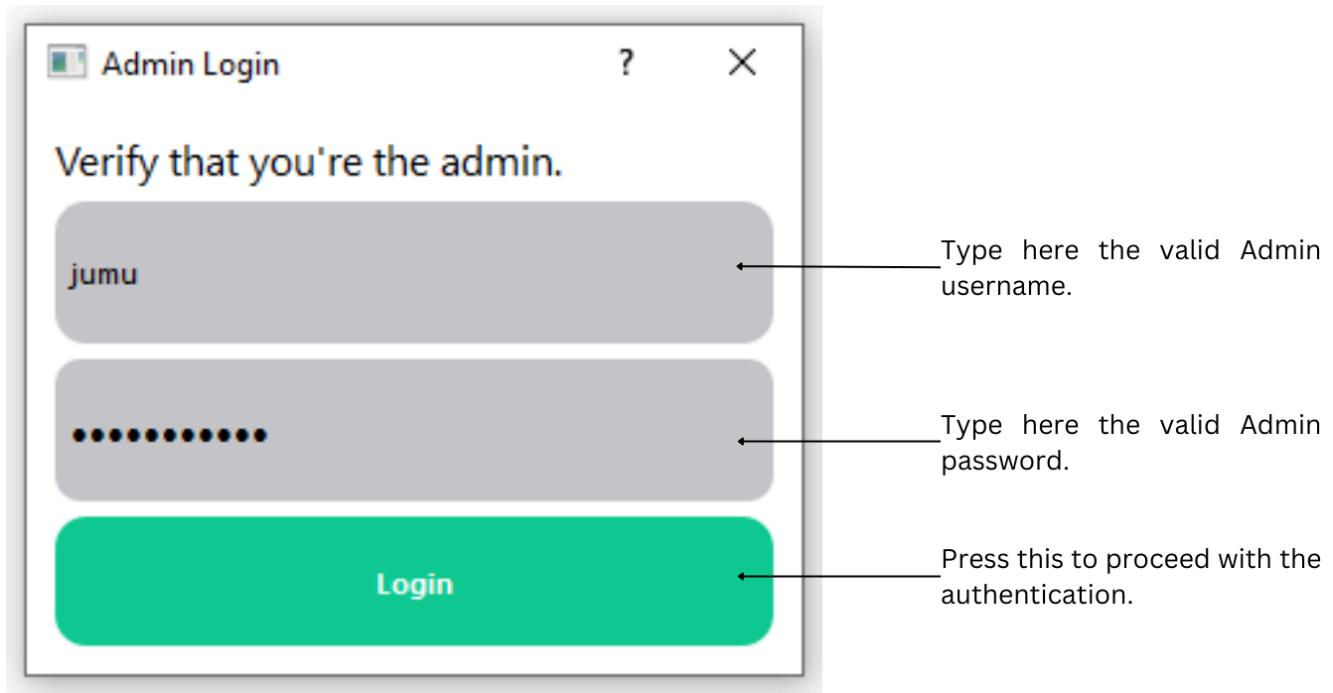

Modify

Click this to modify the account details of the selected user.

Activate / Deactivate

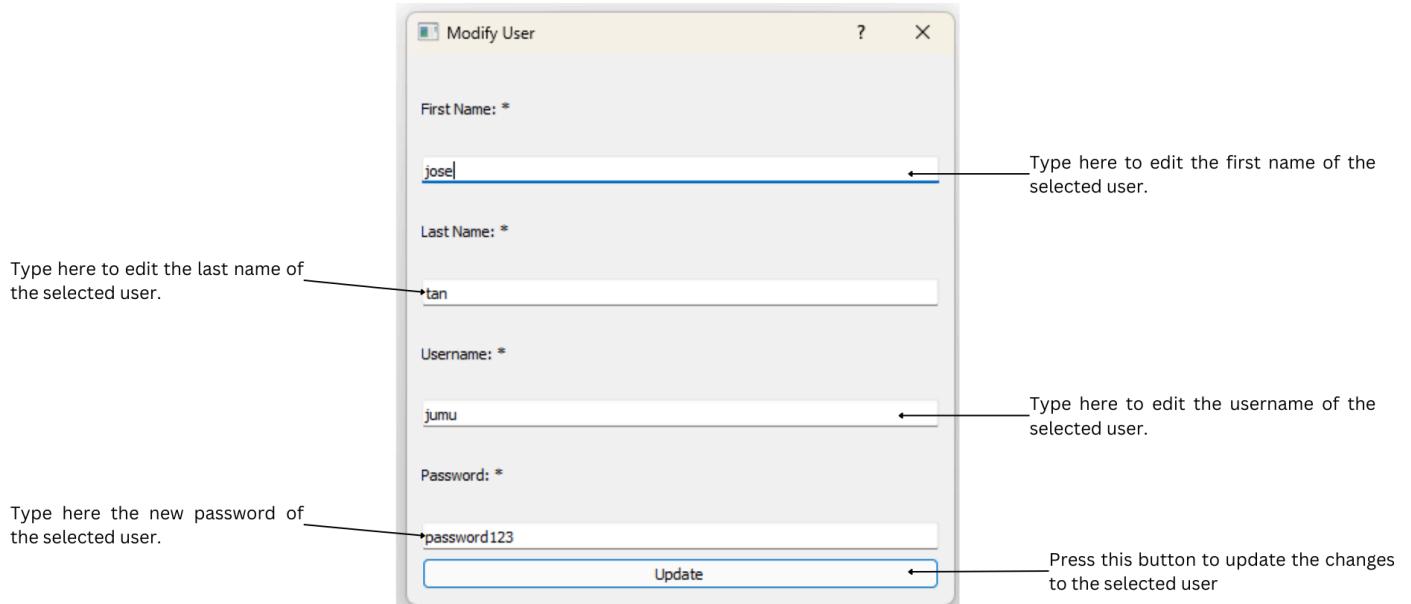

Admin Authentication

After pressing the modify button, a dialog box will pop-up and will ask the user for an Admin.

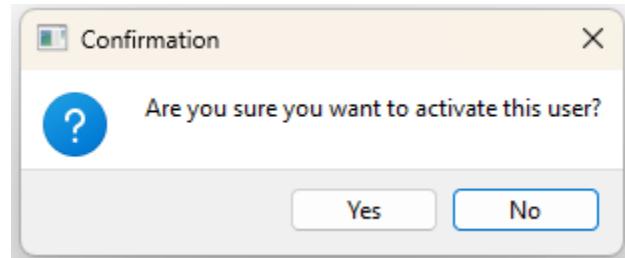

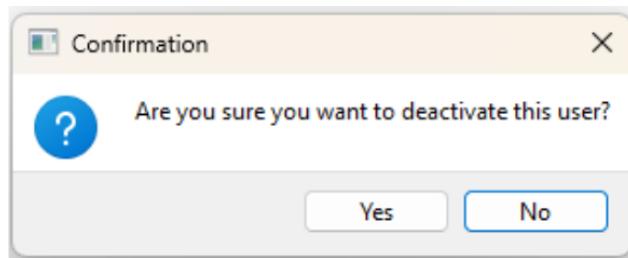

Modify User

This will pop-up when the “Modify User” button is clicked.

Activate / Deactivate

These will pop-up when the “Activate / Deactivate ” button is clicked.

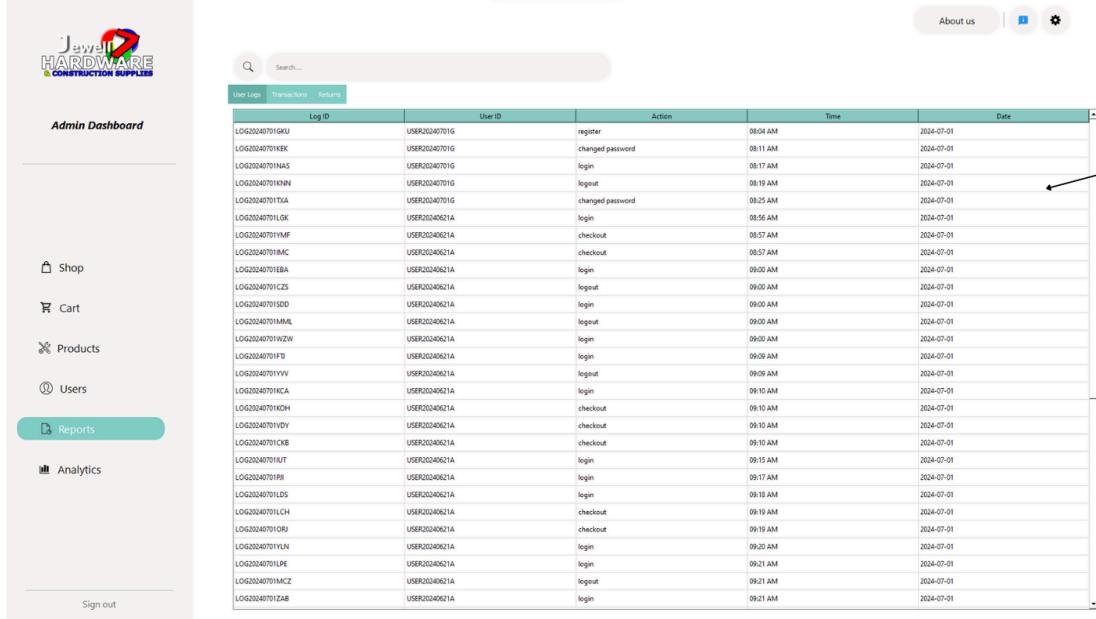

X. Reports

This section of the program will display all reports regarding the system. It will display reports such as the user_logs, transactions, and returns.

User Logs

This table will show when the “User Logs” tab is clicked.

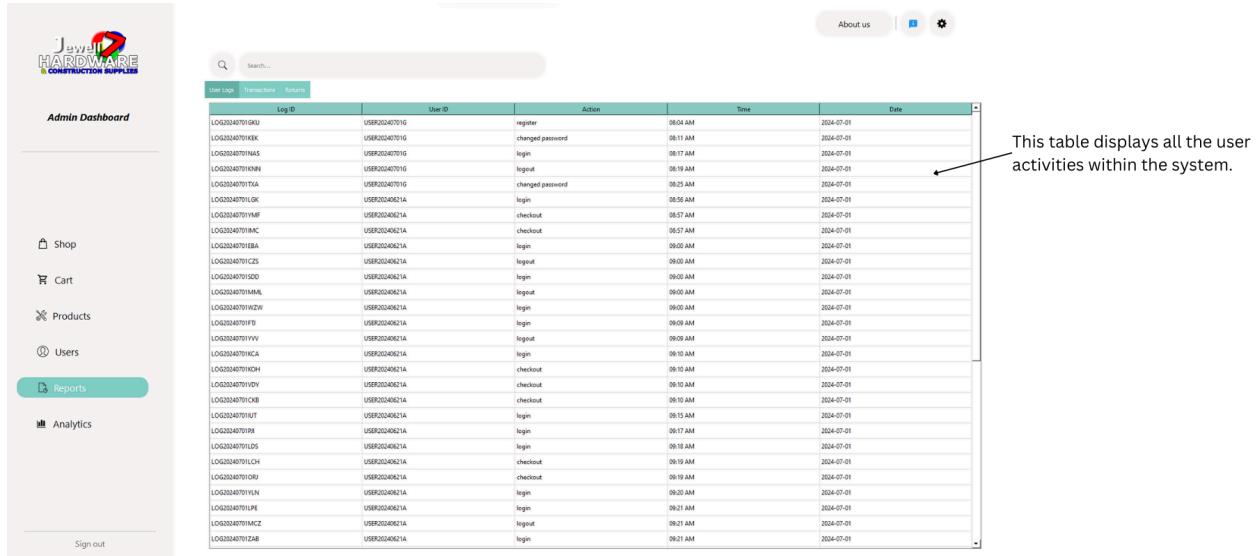

The screenshot shows the Jewel Hardware Admin Dashboard. On the left, there's a sidebar with links for Shop, Cart, Products, Users, Reports (which is highlighted in green), and Analytics. The main area has a search bar and tabs for User Logs, Transactions, and Returns. The User Logs tab is selected, displaying a table of user activities. The table has columns for Log ID, User ID, Action, Time, and Date. An annotation with an arrow points to the table with the text: "This table displays all the user activities within the system."

This is an example of a transaction that's been flagged.

Cash Register

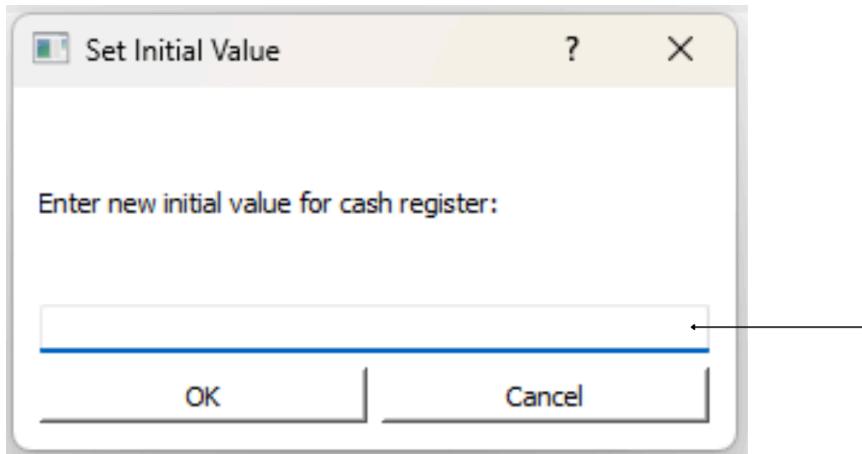

This will manually change the starting value of the system's cash register.

This will manually update current value of the system's cash register.

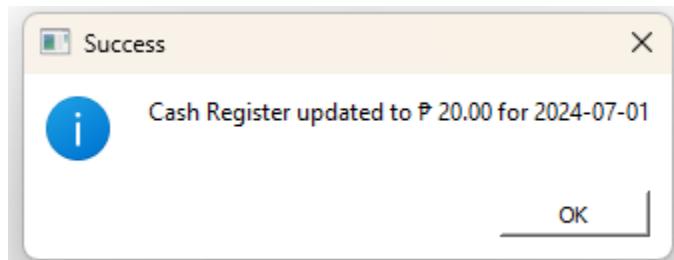

This will modify the value of the system's cash register

Set Initial Value

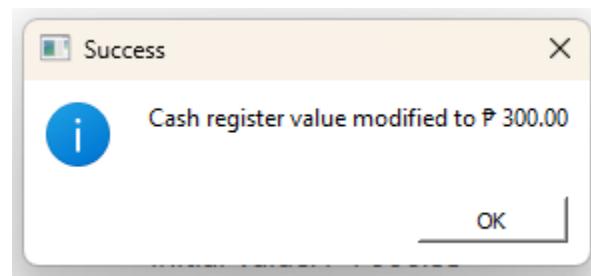

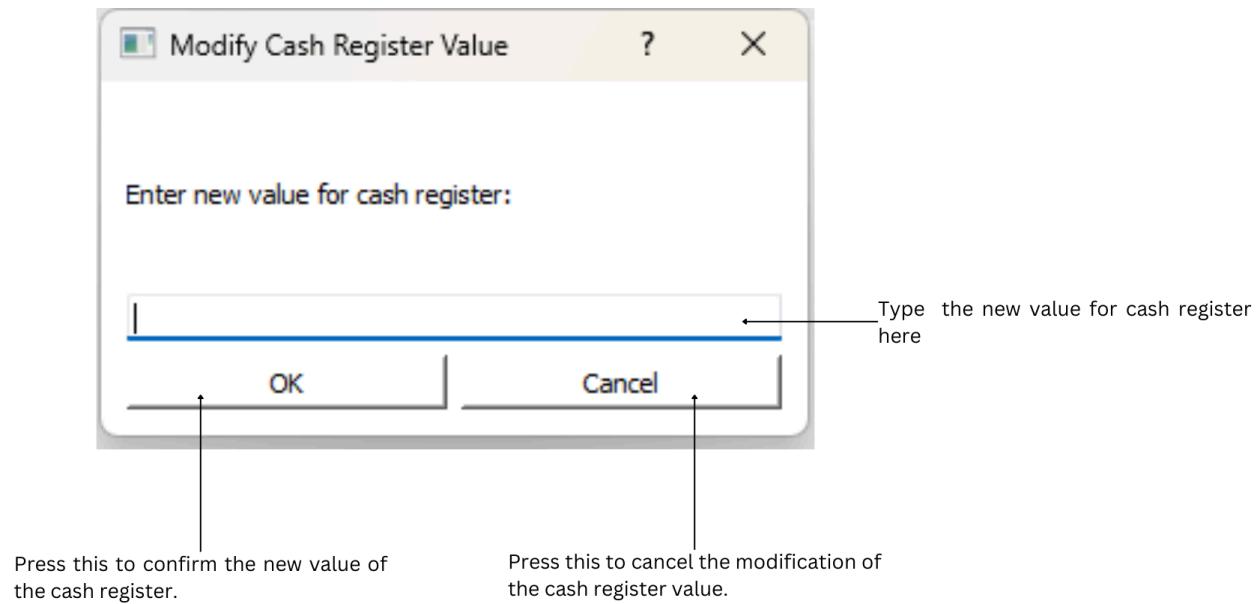

Type the initial cash value of the cash register. The initial value will serve as a reference whether the total revenue at the end of the day matches the total cash within the register deducted by the initial value.

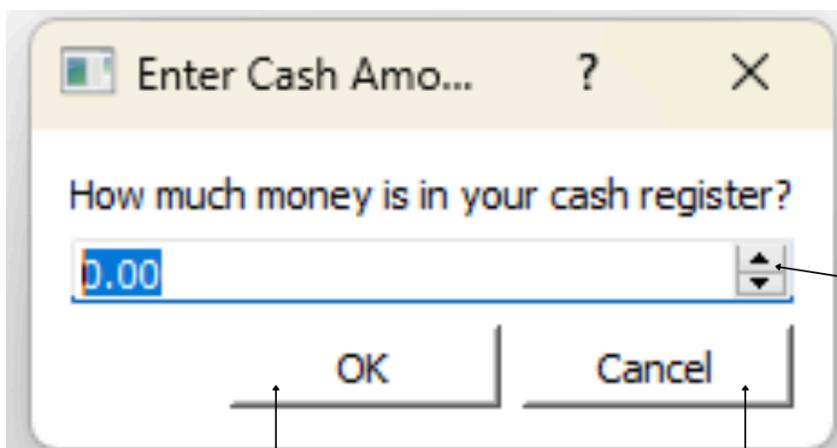

Save Current Cashier

Modify Cash Register

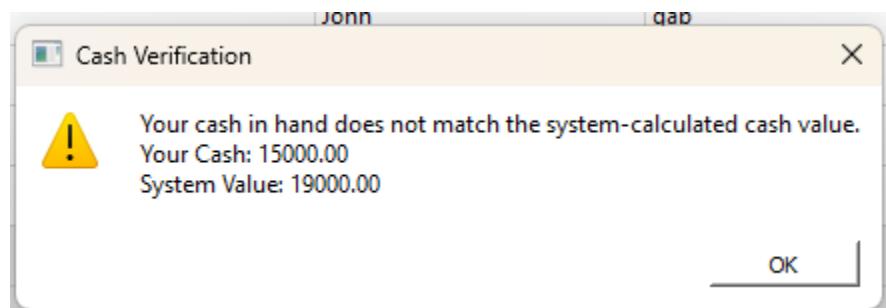

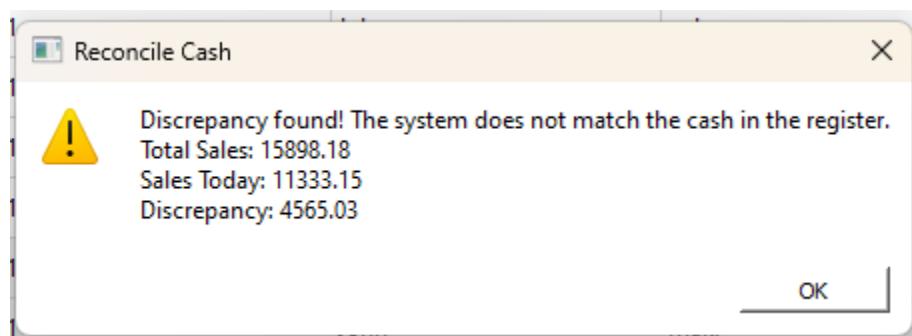

Reconcile Cash

Type or press the up or down button to manually adjust the quantity amount in the cash register.

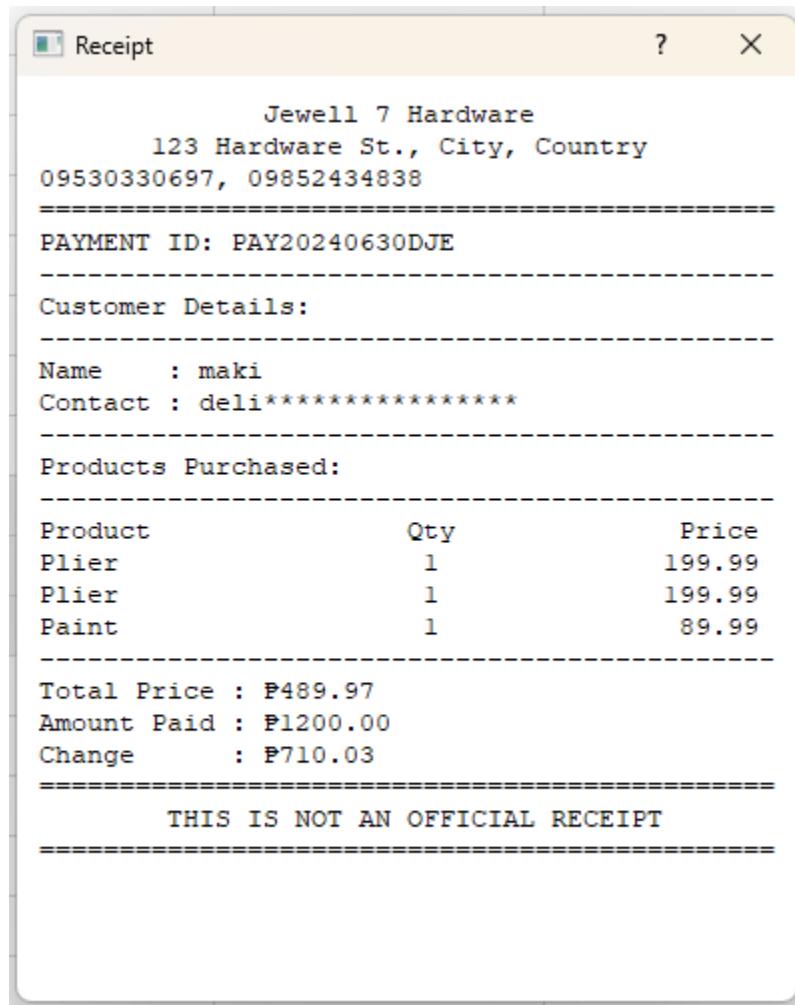

Press this to confirm the value of the cash register.

Press this to cancel

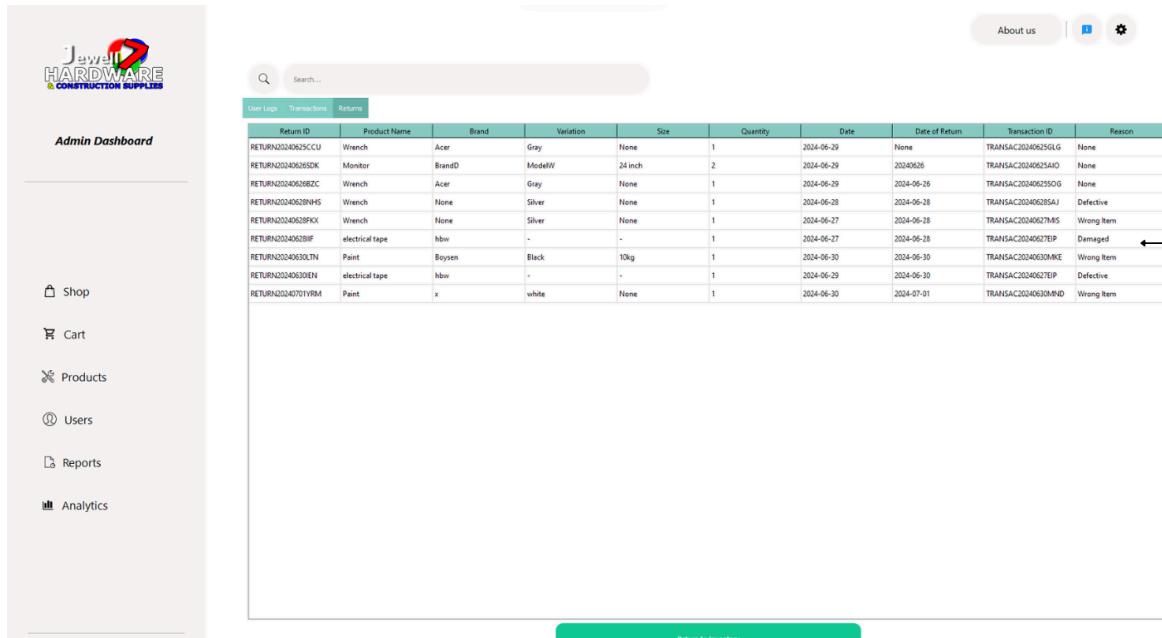

Generate Receipt

This will button will generate an unofficial receipt for the selected transaction, which includes all the important information within the transaction.

Returns

This table will show when the “Returns” tab is clicked, along with a button to return a suitable item to the inventory.

The screenshot shows the Admin Dashboard of Javvish Hardware. On the left sidebar, there are links for Admin Dashboard, Shop, Cart, Products, Users, Reports, and Analytics. At the bottom left is a 'Sign out' link. The main content area has a search bar and tabs for User Logs, Transactions, and Returns. The Returns tab is selected, displaying a table of returned products. The table includes columns for Return ID, Product Name, Brand, Variation, Size, Quantity, Date, Date of Return, Transaction ID, and Reason. The table data is as follows:

This table displays all the information about the returned products

Return to Inventory

Press this button to return a selected item that has a valid reason to the inventory.

XI. Analytics

This section of the program will display a customizable graph/chart that will visualize the data within the system, simplifying the viewing of the hardware's statistics. The user can customize the time period and the data to display. The system can predict the potential sales for the week via Linear Regression.

Graph Placeholder. This part will be updated when the "generate" button is pressed.

Chart or Graph Placeholder

Chart Type: Line Chart

Time Period: Today

XII. About Us

This section of the program will display store information system information, and the developers behind the development of the software.

The screenshot shows the Admin Dashboard for Jewell 7 Hardware. On the left, there's a sidebar with the logo and navigation links: Shop, Cart, Products, Users, Reports, and Analytics. At the bottom of the sidebar is a 'Sign out' button. The main content area has a teal header bar with the title 'About Us'. Below it are three sections: 'Store Information', 'System Information', and 'Team'. The 'Store Information' section contains text about the store being located in Cainta Rizal and its purpose for hardware needs. It also lists two contact numbers: 0985-2434838 and 0953-0330697. The 'System Information' section describes the product management system, mentioning Python programming and SQLite database. The 'Team' section lists three developers with their names, roles, and profile pictures:

- Buenaventura, John Gabriel N. (Frontend Developer)
- Santos, Johan D. (Full-stack Developer)
- Tan, Jose Mari V. (Full-stack Developer)

XIII. Help

This section of the program will display helpful information to the user including the Frequently Asked Questions (FAQ) and the complete user-manual.

FAQ

The screenshot shows the Admin Dashboard for 'Jewel HARDWARE CONSTRUCTION SUPPLIES'. The left sidebar lists navigation options: Shop, Cart, Products, Users, Reports, and Analytics. The main content area is titled 'Frequently Asked Questions' with a sub-instruction: 'Quick answers to questions you may have. Can't find what you're looking for? Check out our full documentation.' Below this, there are four FAQ cards:

- When I generate a line graph from the data of the previous week, it shows a broken line. What does this indicate?**
The broken line represents the projected values of the graph for the next day, estimating the number of transactions based on past transaction data.
- When I generate a pie chart or a bar chart, not all product names or categories are displayed. Why is that?**
The broken line represents the projected values of the graph for the next day, estimating the number of transactions based on past transaction data.
- What does "Threshold" mean?**
Threshold is a point or level where inventory must be reordered to avoid stockouts.
- What do colors signify in product management?**
 - High stock level, restocking is not a priority.
 - Moderate stock level, restocking is optional.
 - Low stock level, restocking is highly recommended.

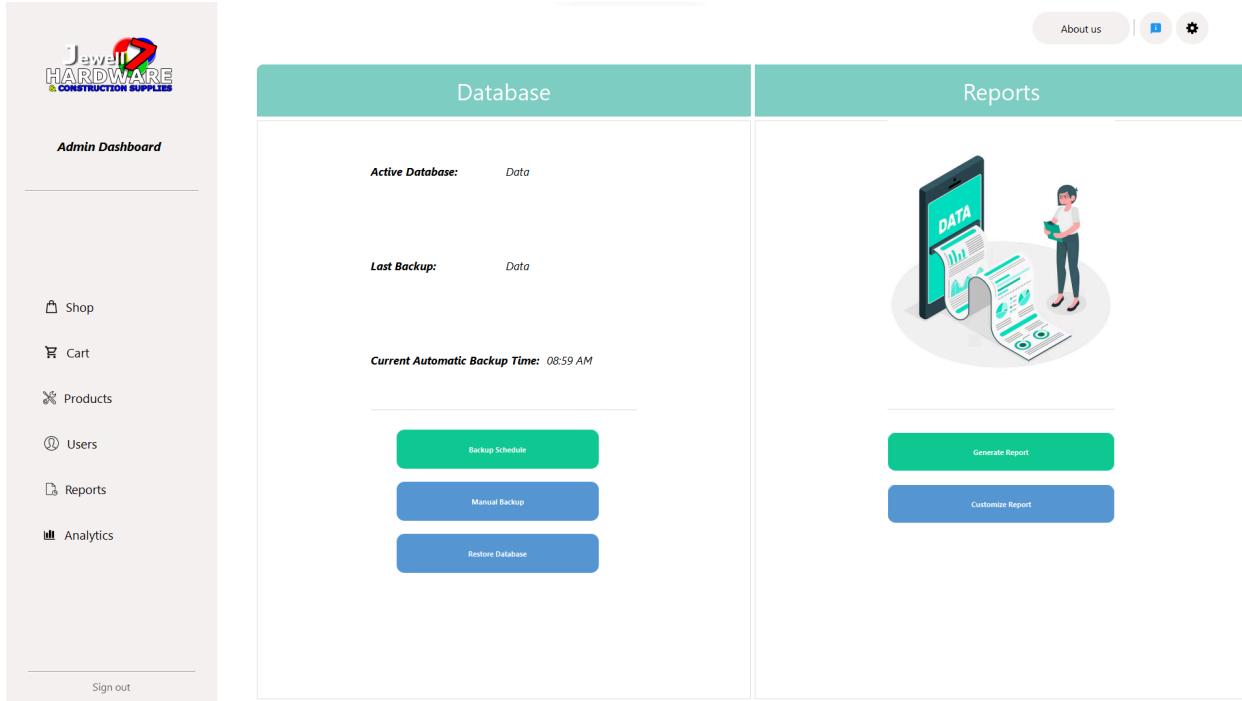

At the bottom of the sidebar, there is a 'Sign out' button.

USER MANUAL

This is the user manual. This manual aims to guide the user through explanations and instructions for each module and their components.

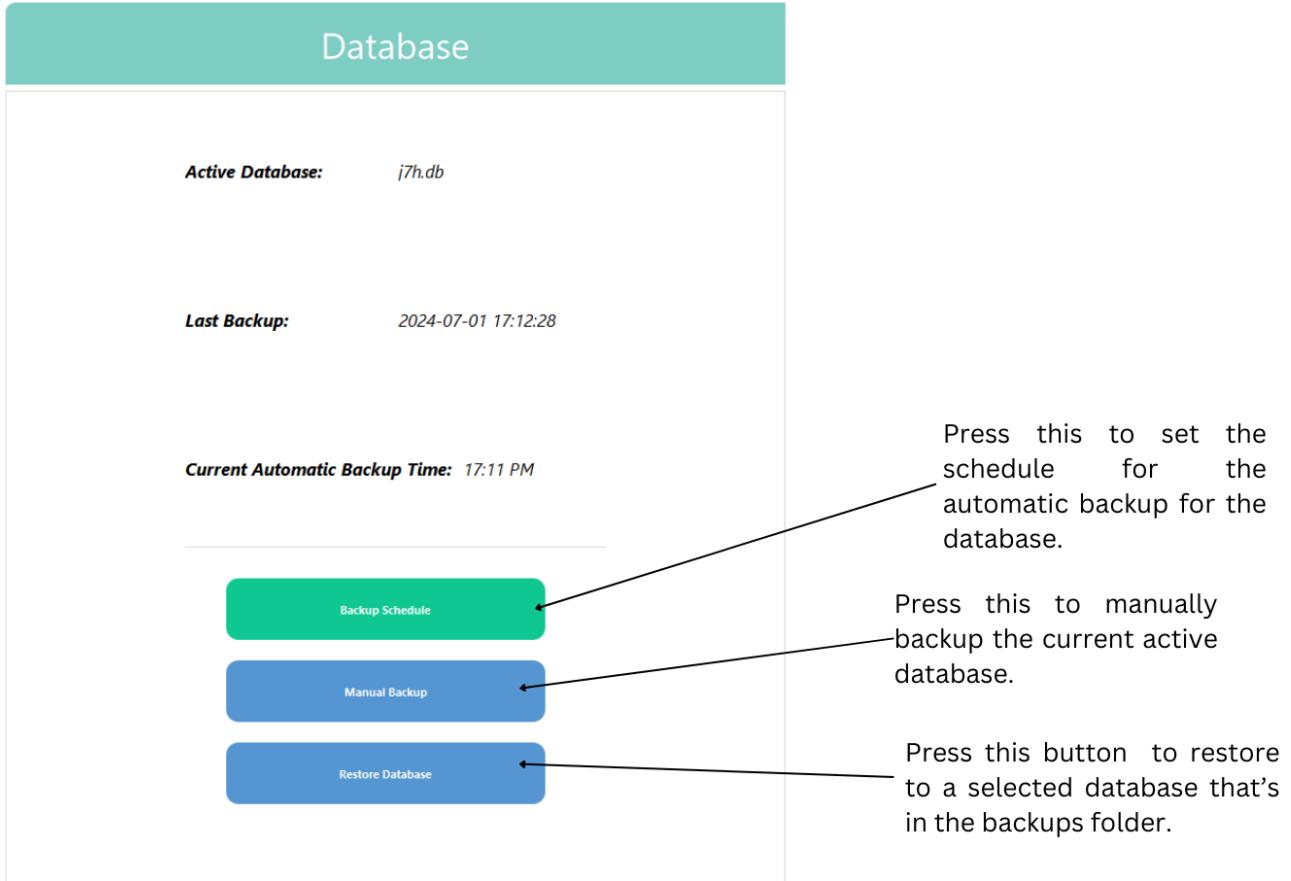

XIV. Database Settings / Reports Generation

This section of the program will show the active database and the different actions that can be performed to the database. Also, this is the section of the program where the user can customize and generate a report that's in a pdf file format.

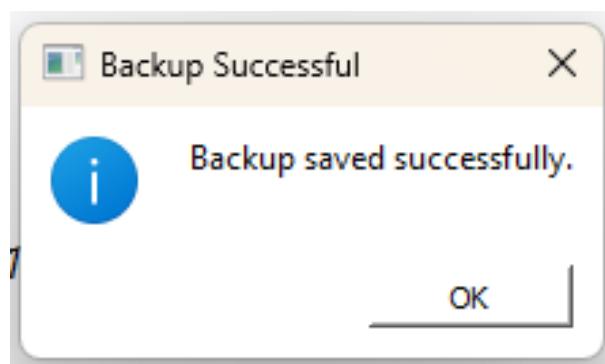

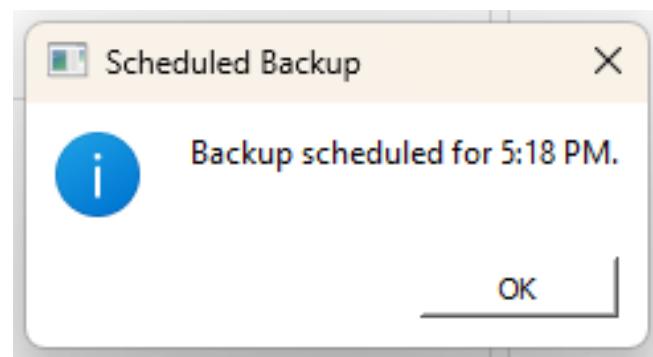

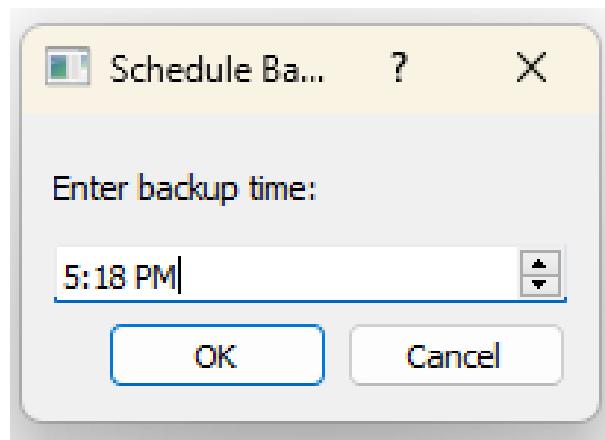

The screenshot displays the Admin Dashboard interface. On the left, there is a sidebar with the company logo 'Jewell HARDWARE CONSTRUCTION SUPPLIES' and a navigation menu including 'Admin Dashboard', 'Shop', 'Cart', 'Products', 'Users', 'Reports', 'Analytics', and 'Sign out'. The main content area is divided into two sections: 'Database' and 'Reports'. The 'Database' section shows the 'Active Database' as 'Data', the 'Last Backup' as 'Data', and the 'Current Automatic Backup Time' as '08:59 AM'. It features three buttons: 'Backup Schedule' (green), 'Manual Backup' (blue), and 'Restore Database' (blue). The 'Reports' section features a cartoon illustration of a person standing next to a large smartphone displaying a 'DATA' interface. It includes two buttons: 'Generate Report' (green) and 'Customize Report' (blue).

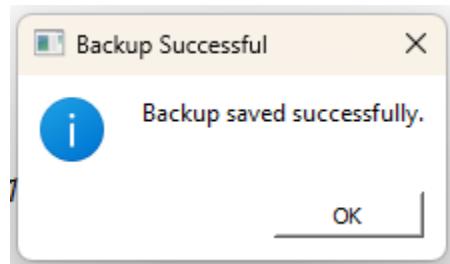

Database Settings

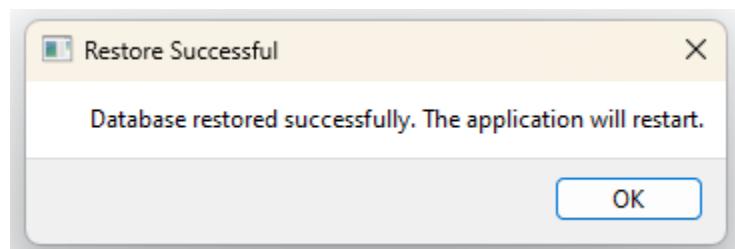

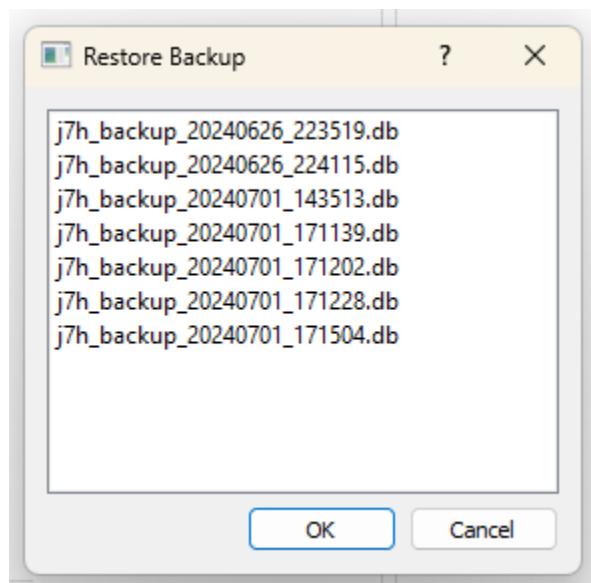

BACKUP SCHEDULE

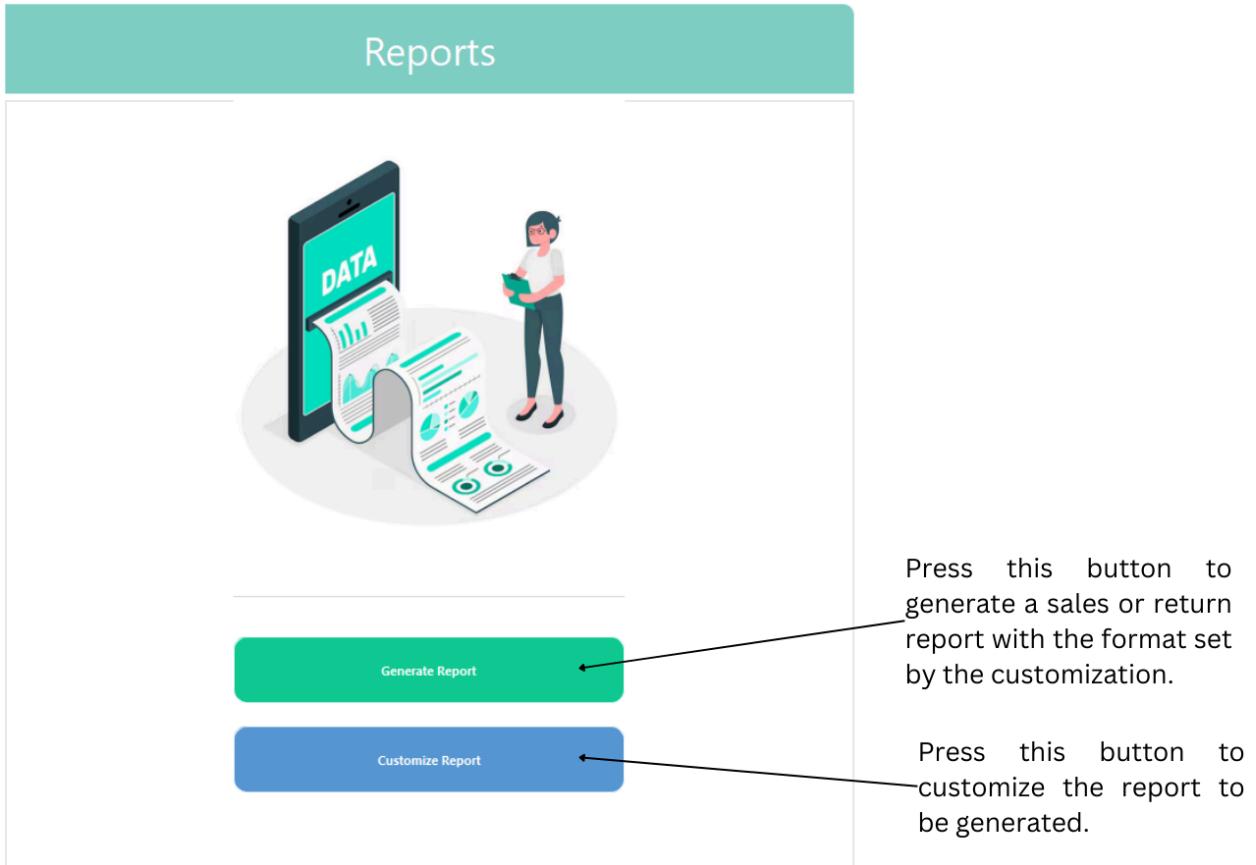

MANUAL BACKUP

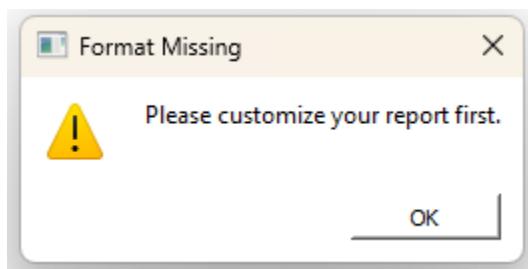

RESTORE DATABASE

REPORTS GENERATION

This will show up when “Generate Report” is pressed without customizing first.

This is a sample report, with a “Save as PDF” button that will save the report as a pdf file.
